

Project Manager Role

Summary

- Clevermed is a leading clinical systems provider specialising in Maternity, Neonatal, and other critical care patient data management solutions across the UK and beyond.
- **We are looking for a highly motivated and skilled Project Manager to be responsible for overseeing and managing new site BadgerNet Implementation for our Maternity and Neonatal care record solutions.**
- This role would work closely with our Clinical Specialists and report regularly to the Programme Manager to highlight activity, issues/problems, and suggestions for continued improvement relating to implementing and establishing the national BadgerNet Services. This is a hands-on role that will involve day to day problem solving and initiative to resolve issues.

Core Skill mix required

- Proven Project Management experience in the field of hospital IT solution implementations
- Good general high-level understanding of Client, Server and Networking technologies
- Personal responsibility and accountability
- Excellent inter-personal and communication skills
- Problem solving and engagement

Location and travel

- This is a full-time position based in our Edinburgh office (relocation expenses considered)
- Ability to travel across all of UK at short notice for on-site project management meetings with our customer sites.

Remuneration

- Salary based on skill mix and experience.
- Other standard Clevermed benefits – pension; holidays; gym membership etc.

Contact

- Please email hr@clevermed.com with your CV and contact details.
- We are looking to recruit a suitable person for this role ASAP.
